

Encode ASPERGILLUS SPP. ID Kit

Item code: EIL-F-ASPR

Technology: PCR / Real Time PCR/ PCR

Manufacturer: ENCODE

Size: EIL-F-ASPR-10 Rxns

EIL-F-ASPR-25 Rxns

EIL-F-ASPR-50 Rxns

EIL-F-ASPR-100 Rxns

BACKGROUND:

Aspergillus is a genus consisting of several hundred mold species found in various climates worldwide. It causes various infections and disease like aspergillosis. The signs and symptoms of aspergillosis vary with the type of illness, like fever, cough that may bring up blood or plugs of mucus and worsening asthma. The urgent need for rapid, accurate, and sensitive methods for the detection of *ASPERGILLUS SPP.* is mandatory.

KIT DESCRIPTION:

A real-time PCR test for the detection of *Aspergillus fumigatus*, *Aspergillus flavus*, *Aspergillus terreus*, *Aspergillus niger* and *Aspergillus nidulans* from purified sample.
