

Micro Pipette Stand, 6 Place

CAT # PSTN-6.0

Product Description

- A pipette stand is a simple and elegant way to increase the life-span of your laboratory pipettes.
- A pipette should never be left resting on the bench with liquid inside the pipette tip, so a stand or carousel affords a convenient place to park the pipette when an urgent matter arises that requires making an interruption during pipetting.
- Additionally, pipettes left lying on a lab bench are more prone to being accidentally knocked onto the floor which can break the pipette or harm delicate internal components.
- Accepts a wide range of the most popular pipettes as seen in the image.
- Acrylic Pipette Stand White, Pipettor Holder Z-shaped, Pipette Rack Holds Up To 6 Pipettes

▪ **Product details at-a-glance / Technical Specifications**

Items	Specification
Material:	Acrylic
Shape	Z-shaped,
Cap Style	Screw Cap
Thickness	6 MM
Weight	600- 750 G
No. of Slot	6
Height	270 mm
Length	240 mm
Slot width	24 mm
Storage	Room Temperature
Sterile:	No
